- The clients execute searches on metadata and/or the content of scanned documents.
- The clients define their own types of documents, metadata and filters.

Virtual Drive: Document Manager

Search, process and analysis of high-volume data in real time with the Mototech Group Big Data platform.

The Business

The mission of the Ministry of Tourism is to promote the optimal conditions of competitiveness that lead to the balanced and sustainable development of the Argentine tourism sector and to the improvement in the quality of life of residents and visitors. The vision is to turn the Argentine Republic into the best tourist positioned country in South America for the quality and diversity it has to offer, based on balanced territorial developments that respect the habitat and identity of its citizens.

The Problem

The need was to have tourist information sections at each access point to the Argentine Republic, with the aim of facilitating tourists access to the country and to provide a cordial and simple interface that covers all questions or queries that any tourist I could have.

The Solution

A search application was developed with the information provided by the ministry, as well as other sources of information such as airlines, public and private transportation services, car rental, hotels, restaurants, coupons or access to weather consultations in the different regions of the country.

Planned Benefits

Provide an information platform with 24 x 7 x 365 availability, thus improving the attraction and attention for international users.
